# **ABOUT THE COURSE**

The Attacking Web Applications course takes you deep into the world of web technologies, exploring design flaws and misconfigurations to identify and neutralize potential threats. This thrilling journey leads you through the complex layers of web applications, from client-side to server-side, unraveling the intricate communication between them.

Prepare yourself for a quest to discover vulnerabilities in web applications, protect sensitive information from malicious actors, and emerge as a skilled defender of secure web environments.

# Instructor- Led Online Duration: 45 Hours

- Security Researchers
- Web Developers
- QA Engineers
- Penetration Testers
- Red Teamers
- Security Enthusiasts
- Security Architects
- Bug Bounty Hunters

# **COURSE OUTLINE**

#### Introduction

- Web Applications 101
- WAPT Methodology
- Taking Notes
- Lab Setup
- Introduction to Kali Linux & Tools
- Introduction to Burp Suite
- Introduction to ZAP
- HTTP Internals
- OWASP & CWE
- OWASP Checklist & Testing Guide

#### **Information Gathering**

- Passive Reconnaissance
- Active Reconnaissance

#### **Enumerating Web Applications**

#### **Injection Attacks**

- SQL Injection
- Cross Site Scripting (XSS)
- OS Command Injection
- XXE Injection
- Server-Side Template Injection

#### Web Attacks

- OWASP Web Top 10
- IDOR
- SSRF
- Local File Inclusion (LFI)
- Remote File Inclusion (RFI)
- Communication Security

#### Web API Attacks

- Using Swagger & Postman
- OWASP API Top 10
- Open Redirection
- API Username Enumeration

#### NA.

vorum > 11.corrent\_page mem > 11.corrent\_page w > dt = start. w > dt = st

Mass Assignment

#### Fuzzing

- Fuzzing Setup & Tooling
- Leveraging Burp Intruder
- Fuzzing for Injection Vulnerabilities

#### Static Application Testing (SAST)

**Dynamic Application Testing (DAST)** 

#### **Real World Exploits**

#### Conclusion

- CVSS Scoring
- Building Pentest Labs
- Automation of trivial checks
- Professional Report Writing
- Bug Bounty
- Next Steps

## ABOUT DARKRELAY

Founded in 2019, DarkRelay Cybersecurity is led by veterans who are SANS 760, GXPN, GPEN, OSCP, OSCE, and CISSP certified with 20+ years of experience in cyber security research and development. DarkRelay Security Labs uses global its perspective to build valuable security programs for its students.

Whether you are a beginner or an experienced cyber security professional, our training will address your every learning need, challenge, and career goal.

### **OUR TRAININGS**

- Professional Penetration Testing
- Attacking Web Applications
- Fuzzing & Exploit Development
- Software Development Security
- Advanced Penetration Testing
- Vulnerability Assessment
- Red Teaming
- Ethical Hacking
- Malware Analysis
- Cloud Security
- Mobile Security
